

WERT Crypto Payment Bagisto Extension

**WERT CRYPTO
PAYMENT**

BAGISTO

User Guide

Wert crypto payment is a module that enables merchants to accept payments in cryptocurrencies. With this module, merchants can also display prices in cryptocurrency, making it easier for customers to see the cost of items in digital currencies. The system uses real-time crypto exchange rates, ensuring that merchants always have the most up-to-date conversion rates available. It's a convenient and efficient way for merchants to embrace the world of cryptocurrencies and cater to customers who prefer using digital assets for transactions.

Introduction and Purpose

The purpose of Wert crypto payment is to help merchants accept payments in cryptocurrencies and display prices in digital currencies. It uses real-time crypto exchange rates to ensure accurate conversions and make transactions with cryptocurrencies more convenient for both merchants and customers.

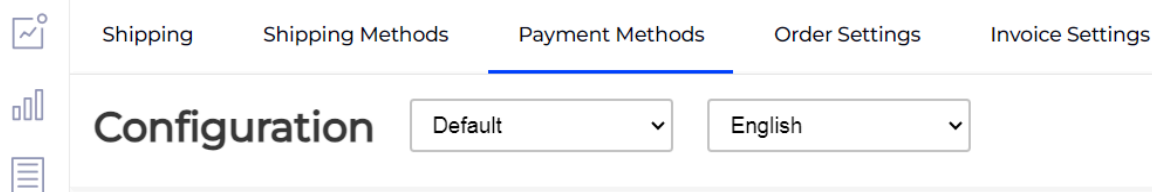

How to enable the module

To activate the Wert module, follow these steps:

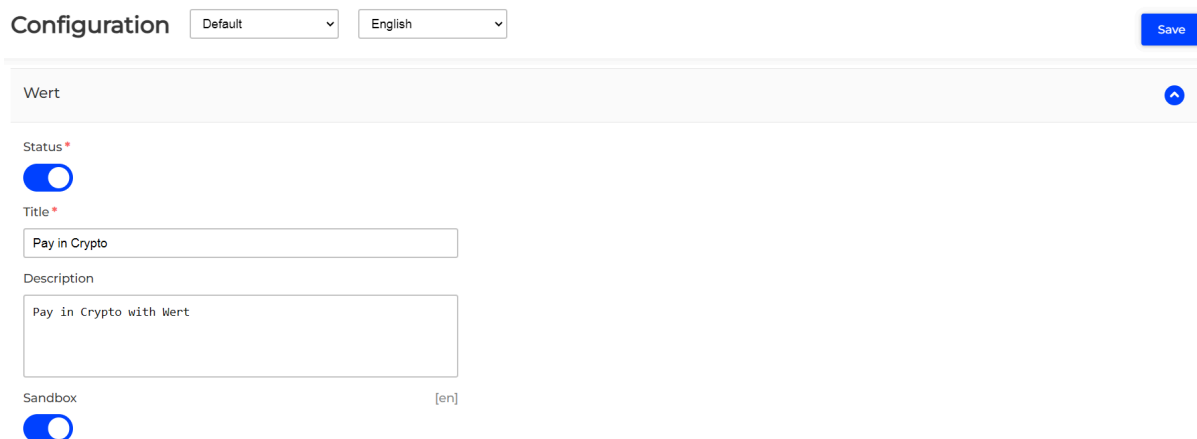

1. Navigate to the "Configuration" section in your sales settings.

2. Select "Payment Methods" from the available options.

1. Look for the Wert module in the list of payment methods.
2. Enable the Wert module by toggling it on.

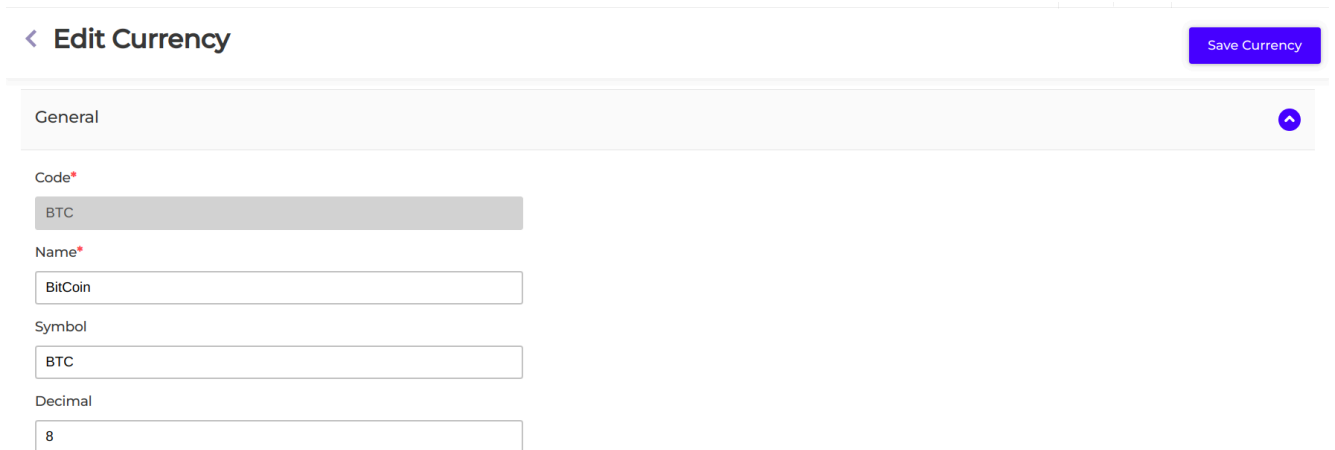

3. Save the changes to apply the activation.
4. You need to have a Wert partner account to use this payment method. Please navigate [here](#). They will provide you with partner id and private key.
5. You need to select the crypto currency in which you want to accept the payment along with the wallet address where you will get the crypto currencies once payment is done.

-
6. You also need to add the Smart contact address and input data in the configuration.

Add Crypto Currencies

If you want to show the prices in crypto currencies like (BTC, ETH etc) then you have to add these currencies in the backend. You need to navigate to Settings -> Currencies and then add the new currency. Below is the screenshot of the already added crypto currency.

< Edit Currency Save Currency

General

Code*
BTC

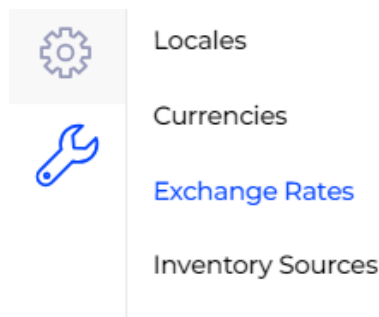

Name*
BitCoin

Symbol
BTC

Decimal
8

How can you check the current exchange rate

Once the currencies were added, if you want to fetch the latest currency rates then you have to navigate to Settings -> Exchange rates. Once you click on the updates rates button it will bring the updated rates for crypto and non crypto currencies as well. We have created a scheduled job for this which will run in every 15 minutes to bring the latest crypto rates.

Checkout process

During the checkout process, customers are presented with a user-friendly interface that guides them through the payment options. On the checkout page, customers are required to perform two simple steps:

Step 1: Select Shipping Method

In the first step, customers need to choose their preferred shipping method. This allows them to select how they want their purchased items to be delivered.

Select Shipping Method

- ETH 0.01**
Flat Rate- Flat Rate Shipping
- ETH 0.00**
Free Shipping- Free Shipping

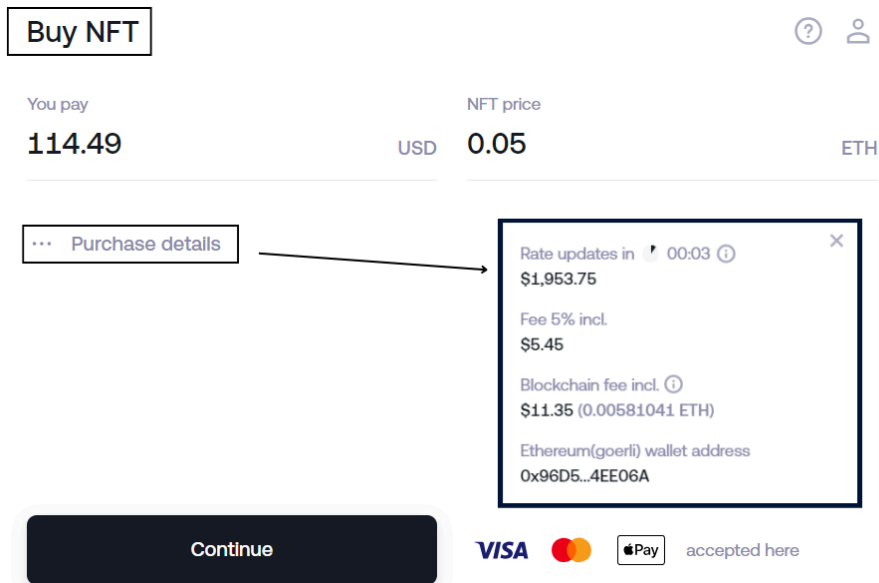

Step 2: Choose Wert Crypto Payment Method

After selecting the shipping method, customers proceed to the second step, where they can opt for cryptocurrency payment using the "Wert" platform. Among the available payment methods, customers can easily locate and select the "Pay Crypto with Wert" option.

Select Payment Method

- Pay in Crypto**

After selecting the payment method, a popup window opens, allowing the customer to complete the transaction where customer needs to add all the required details, customers can review and confirm their purchase details by clicking on three dots or a menu icon.

The screenshot shows a "Buy NFT" interface. At the top, there is a "Buy NFT" button, a help icon, and a user profile icon. Below this, the payment details are displayed: "You pay 114.49 USD" and "NFT price 0.05 ETH". A "Purchase details" button with three dots is highlighted, and an arrow points to a popup window. The popup window contains the following information: "Rate updates in 00:03", "\$1,953.75", "Fee 5% incl. \$5.45", "Blockchain fee incl. \$11.35 (0.00581041 ETH)", and "Ethereum(goerli) wallet address 0x96D5..4EE06A". At the bottom of the screen, there is a "Continue" button and logos for VISA, Mastercard, and Apple Pay with the text "accepted here".

Verification process during checkout

To initiate the verification process, customers are required to enter their mobile number first. Once the mobile number is provided, after that they need to select their country from a dropdown menu. The next step involves submitting essential verification documents, which include an address document, a valid ID, and a selfie. After successfully uploading these documents, customers can proceed by clicking on the "Continue" button. At this stage, they will be prompted to enter their email address to initiate the final phase of the verification process.
